ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944 AND 1945

CURRENT TRENDS

Week Ending 26 Jan 1946

The admission rate for All Causes marks a further increase, with a value of 761, as against 736 last week, and 730 for the corresponding week a year ago. The increase is noted in all but the 5th, 7th, and 9th Naval Districts. The 6th Naval District shows the largest relative increase, with 20% over last week's rate. The 5th Naval District shows a drop, but still leads all the other Districts with a rate of 955.

The rate of 263.6 for Respiratory Diseases is a slight increase over the rate of 260.8 reported the week previous, and is about 6% higher than the rate reported a year ago. The 1st Naval District, with a rate of 283.0, has the largest increase over the week previous, that rate being 45% greater than the one for the latter. The 7th Naval District has the largest relative decrease, with a rate of 93.7 which is 25% below the rate of the week before; that rate is also the lowest one reported. The 9th Naval District still leads all the others, with a rate of 368.5, but this compares favorably with the one of 403.4 reported the week previous.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The combined rate of 185.7 is practically the same as it was the week before, but is still 18% greater than it was a year ago for the corresponding period. Largest increases are in the 1st and 6th Naval Districts, whose rates, 233.0 and 172.1, respectively, represent increases of 38% and 58% correspondingly over last week's rates. Other Naval Districts which show increases are the 4th, 8th, 12th, 13th, and the Potomac and Severn River Commands. The 1st Naval District has the highest rate. The decreases are not so spectacular, the most important ones being in the 5th and 7th Naval Districts who report rates of 218.3 and 72.5, respectively, that are 19% lower than the ones for the preceding week. The 7th Naval District has the lowest rate.

PNEUMONIA--BRONCHO AND LOBAR. The combined rate of 2.3 for these two diseases represents a very slight decrease from the rate of 2.4 reported the week before; that rate compares very favorably with the rate of 5.0 reported a year ago, it being less than half the latter. The 6th, 7th, 8th, 9th, and 11th Naval Districts all show increases, while the other Districts have either stationary or decreasing rates. The largest rate of 5.9 is reported by the 9th Naval District. The Potomac and Severn River Commands, the 1st, 4th, and 13th Naval Districts have zero rates.

PNEUMONIA, ATYPICAL. The rate of 3.6 compares unfavorably with those of 2.8 reported a week ago, and 2.0 reported a year ago. The 11th Naval District leads all the others with a rate of 13.3, which is more than twice the rate of 5.7 reported the preceding week. The Potomac and Severn River Commands, the 7th, and 12th Naval Districts report zero rates.

TONSILLITIS AND PHARYNGITIS, ACUTE. With a combined rate of 71.9, these two diseases continue the rise begun the first week in January, but the pace of this rise is diminishing. That rate is 14% lower than the one reported a year ago for the corresponding period. Substantial increases are shown by the 1st and 13th Naval Districts whose rates of 49.1 and 38.2 represent gains of 79% and 50%, respectively, over the rates of last week. Also, the 4th and 12th Naval Districts, respectively, show gains of 38% and 28% over last week, while the 3rd and 11th Naval Districts show minor gains. On the other hand, the 6th and 7th Naval Districts, with rates of 22.0 and 19.6, respectively, show a decrease of roughly 45% from the week previous, while the Potomac and Severn River Commands have a 23% drop. The highest rate, 143.5, comes from the 9th Naval District, while the lowest, 19.6, is from the 7th Naval District.

SCARLET FEVER. The rate of 15.0 marks a 21% increase for this disease over last week, but is still 40% lower than the rate of 25.0 reported a year ago this time. The disease is on the increase in the 4th, 5th, 8th, and 11th Naval Districts, while it is either stationary or on the decrease everywhere else. Although the 9th Naval District shows a drop of 10% from the past week, it still leads all others with a rate of 39.6. The 6th, 7th, and 13th Naval Districts report zero rates.

CEREBROSPINAL FEVER, MENINGOCOCCIC. This is the fourth consecutive week that the rate for this disease is zero in all Naval Districts.

MEASLES. The rate of 6.1 compares favorably with the rates of 7.1 reported a week ago, and 9.0 reported a year ago. The rates are more uniformly distributed than they were the past week; the 3rd Naval District is highest, with 14.5, while the 4th and 7th Naval Districts report zero rates.
